

# kinactiv'root™

science driven by nature

## DECLARATION

- Free L-amino acids 10.50% by mass (selection of 4 aminoacids related with root growth promotion)
- Total nitrogen content 2.75% by mass
- Iron 4.50% by mass
- Manganese 1.00% by mass
- Boron, Molybdenum and Zinc 0.90% by mass

## USE

- Soil Biostimulants used to promote root growth and recovery from situations where root growth is negatively affected (biotic and abiotic). Stimulate root growth in new and established plantations of fruit trees and vegetables as well as nurseries.
- Applications are also useful to help roots to recover from damages caused by plant parasitic nematodes, fungal diseases, insect pests or hydric stress.
- Its use is a complementary action of other agricultural managements such as roots pruning, organic matter incorporation, soil solarisation for control of nematodes.
